

*Fun-filled cycling session for every class and every child*

## Have fun developing new skills, confidence and friendships through a Pro Ride club program

Whole School Days are designed for small schools usually with less than 60 students across the primary age range. During the day, every child in the school takes part in an age related session with their class mates where sessions are tailored to age and ability of the group and use a combination of other Pro-Ride programs to deliver a fun-filled memorable cycling experience.

A program is put together based on the number of children and age range of the classes. A typical program for a school with 40 children for example, might start with a 45 min session for 10-12 nursery/reception using balance bikes (we provide). Next, two KS1 sessions with 8- 10 children in each session would be delivered mainly using their own bikes (we provide spares), and a final session for approx 15 children on their own bikes would run in the afternoon (again, we can provide spares if needed).

To book a day for your school or to check availability and prices, please feel free to get in touch or check the website for details.

"The children loved it. Clear messages were delivered in a fun interactive way and every child gained a priceless lesson whilst having fantastic fun"

**Chris Dyson, Headteacher, Parklands Primary School, Leeds.**
